# Wireless Outlet Switch Looks Small, Thinks Big

The Wireless Outlet Switch connects to any plug-in device, immediately making it a part of the Control4® home automation system and allowing for quick and easy configuration. Featuring intelligent power-sensing abilities, the Wireless Outlet Switch can actually trigger and control events throughout the system based on a device's power level. From the living room floor lamp to garage door opener, the Wireless Outlet Switch adds intelligent, automated features to just about any plug-in device in the home.

It's all part of the Control4 vision. We bring the benefits of a truly automated home to more people with solutions that are affordable, easy to install and designed to adapt to any home or lifestyle.

## Features and Benefits

### Smart Design
- **Small form factor** — With its inconspicuous design and sleek finish, it's virtually unnoticeable.
- **Low profile** — Sits flush against the wall so it can fit behind furniture.
- **Dual outlets** — Two switched outlets give added flexibility.
- **Secure mounting** — Special screw tab design allows for the Outlet Switch to be securely attached to the wall outlet. It won't accidentally be unplugged.

### Easy To Install and Use
- **Wireless** — No special cables to pull through the home.
- **Easy recognition** — Just plug it in, press a button, and it's immediately recognized.
- **Easily controllable** — Immediately controllable from Control4 Keypads and Touch Screens.

### Intelligent From Front To Back
- **Built-in power current sensing** — From turning on the TV to turning off the game console, the Wireless Outlet Switch learns a device's power level and can automatically activate commands.
- **Anytime control** — Lights can be switched on or off based on the time of day.
- **Anywhere control** — Intelligent, reliable, low-power wireless connectivity using the ZigBee™ (802.15.4) mesh networking standard.
- **Energy efficient** — By automating plug-in devices, electricity is only used when needed.

*Drop a disc into your DVD player and watch the TV **automatically** turn on and tune to the correct input while the home theater screen comes down. **Configure** the lights in the backyard pond to come on every evening at sunset. Even **control** the amount of time your family plays on the gaming console.*
